-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,6,7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Muscavage(US 5,268,656 of record).

The reference by Muscavage discloses a PLL system (see figure 1, PLL with oscillator/clock circuit 18, and figure 2 shows details of 18), a first clock being generated by ring oscillator(18), a plurality of clock signals with different phases(clk1-clk4) are shown and a second clock signal(42) is derived from the plurality of clock signals. The first and second clock signals have different phases due to the shift register paths. The registers output eight signals, respectively, to the MUX 38. The plurality of clock signals are based on the first clock signal, i.e., the ring oscillator clock signal(feedback path signal.).The ring oscillator circuit does output a first clock signal.

### *Allowable Subject Matter*

3. Claims 9-16 are allowed.
4. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The examiner could not find fair suggestion for the interpolation action in addition to all else claimed in the prior art.

*Response to Arguments*

5. Applicant's arguments filed 06-10-05 have been fully considered but they are not persuasive. The examiner has considered applicants remarks, however, the rejection is maintained as a first clock signal(ring oscillator)(CLK1, for example) and a second oscillator signal from MUX are provided for.

*Conclusion*

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arnold M. Kinkead whose telephone number is 571-272-1763. The examiner can normally be reached on Mon-Fri, 8:30 am -5 pm.
